

Rondaxe Introduced COG's Software at Informex

At this year's Informex Conference at the Moscone Center in San Francisco, CA, Rondaxe introduced its innovative and easy to use COG's software. COG's is a part of an application suite that has been specifically designed for the unique needs of the drug development process.

COG's is written using Microsoft development tool (.Net and .Net Framework) and is an open, extensible application that can be integrated with an organization's existing applications.
